PHARMACY SOFTWARE

COREflex
the core of your operations

For over 25 years CoreFlex™ has been providing custom automated pharmacy workflow software and controls solutions to the central fill and mail order pharmacy markets. Now, CoreFlex™ is available for your pharmacy. So weather you are a startup or an existing operation that needs a scalable software solution make CoreFlex the core of your operation.

FLEXIBILITY, we specialize in providing you options:

• Modular design for choice of implementing just what you need.

• Scalable platform for growth from 100 RXs a day to 30,000+ RXs a day.

• Customized workflow and functionality efficiently dovetails into your operation.

• Ease of integration to protect your existing and future investments in automation.

FULFILLMENT, we make filling solutions work:

• Real-time communication and status updates with Pharmacy Information Systems.

• Automatic inventory allocation, grouping and routing based on your custom priorities.

• Automatic workload balancing of manual, semi-auto and full-auto counting technologies.

• End to end barcode traceability from receipt through to stock, dispense, pack and ship.

PURCHASING, we provide centralized real time buying:

• Automatically generates consolidated POs by wholesaler for centralized purchasing.

• Allows mixing of inventories for 340b and multiple operations simultaneously.

• Generates pre-sorted sub-POs for quick receiving and replenishment of wholesaler totes.

• Scan PO receiving immediately releases prescriptions awaiting inventory for fulfillment.

INVENTORY, we specialize in inventory controls:

• Automatically updates quantity in real-time as receiving, and filling tasks are performed.

• Prescriptions only released into the workflow when inventory is available.

• Lots and expirations are tracked for every location with full audit trail.

• Business rules are applied to location groups for security and accountability.

You may start by implementing CoreFlex™ as software only so your pharmacy has an organized workflow to fill prescriptions as efficiently as possible with real-time inventory controls.

Then when your pharmacy requires automated dispensing in any format, pouch, blister card, unit of use or vial, CoreFlex™ makes it easier to integrate and easier to get the speed and accuracy automation units are capable of delivering.

All fulfillment coordinated through one scalable platform. Contact CoreFlex™ to discuss a workflow solution for you.
