

Logistics and Inventory Control Solution for Clinics

Link Your Clinics into you Pharmacy Supply Chain:

LINCS™ Clinic Connect enhances your existing inventory solution by providing easy reordering and local inventory tracking to improve your clinic workflows. Inventory is added with a simple scan-in and removed with a simple scan-out of empty bottles. With the click of a button, suggested orders are automatically created, consolidated and sent for fulfillment.

Easy Reordering:

Reordering is quick and easy with our automated suggested ordering and custom order templates. Order by NDC, Custom Formulary, GPI or partial drug name. Efficiently check availability, review and approve orders. Track progress real-time from your fulfillment center.

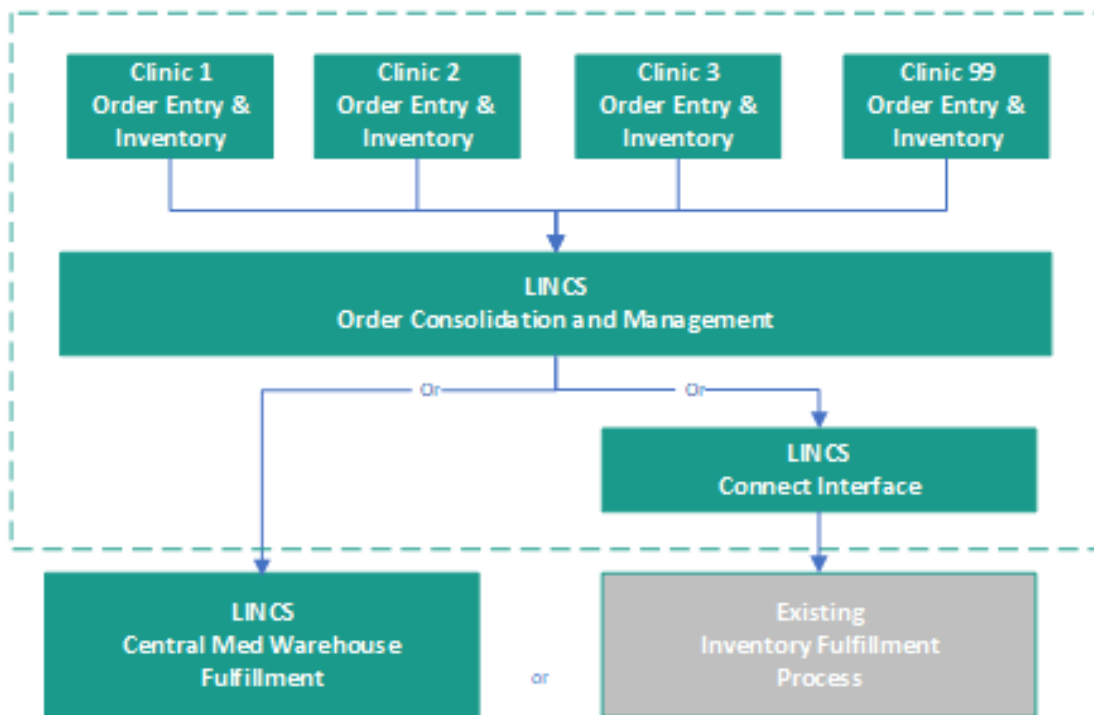

Easy Inventory Management:

Inventory tracking is streamlined with LINCS Scan Once™ functionality. Scan a DSCSA barcode to update inventory, lot, expiration date and automatically track DSCSA for compliance. Perpetual inventory is achieved with a simple scan in at receipt and scan out of empty bottles.

Take Control of your Clinic Inventory:

- Standardize your formulary
- Stop Over Ordering
- Track DSCSA products
- Centralize your purchasing
- Create Order Templates
- Manage soon to expire items
- Reduce inventory costs
- Avoid drug shortages

LINCS Clinic Connect™ Flow

V3.0
